NEELESH JAISWAL

SOFTWARE ENGINEER

PROFESSIONAL SKILLS

Back-end

- Java
- Spring Boot
- RESTful Web Services
- SQL, NoSQL, Spring ORM
- AWS/Azure
- Docker, K8S
- Junit, mockito
- Maven/Gradle
- Git, Bitbucket
- Jenkins
- Grafana & Prometheus
- Agile

Front-end

- JavaScript
- React/Redux
- Cypress
- Webpack
- Jest

PERSONAL SKILLS

- Reliable and professional
- Organized
- Time management
- Team player
- Fast learner

ABOUT

Accomplished and results-driven Senior Software Engineer with over 10 years of experience architecting and delivering scalable financial, fleet management, and enterprise systems. Deep proficiency in full-stack technologies including Java, JavaScript, Spring Boot, SQL/NoSQL, Kafka, React/Redux, AWS, Azure and microservices architecture, with extensive expertise in designing and maintaining large-scale distributed systems. Demonstrates exceptional problem-solving skills and thrives in collaborative, cross-functional team environments.

Proven ability to optimize backend performance, mentor junior engineers, and deliver robust, high-quality solutions across industries, including fintech, wealth management, retail banking, fleet management, and payment platforms. Passionate about staying ahead of the curve in technology trends, actively engaging in public forums and meetups.

A dedicated member of the Amsterdam Java User Group (AJUG) and Utrecht Java User Group (UJUG), regularly participating in and contributing to discussions on Java, cloud computing, and modern development practices. Committed to continuous learning and fostering innovation within the tech community.

PROFESSIONAL EXPERIENCES

SOFTWARE ENGINEER

HCL TECHNOLOGIES LTD
March 2025 - Present | Amsterdam, Netherlands

Java, Spring Boot, RESTful Web Services, Spring ORM, SQL, Kafka, JUnit, Azure, AWS, Kubernetes, Docker, Microservices

Project: ING Mortgages – Mortgage Construction Deposit & Repayments

- Developed and maintained microservices for ING's Mortgage Construction Deposit (Bouwdepot) platform — a dedicated building fund account that enables homeowners to manage staged disbursements of mortgage funds during property construction or renovation.
- Implemented backend services supporting mortgage repayment workflows, including annuity and linear repayment schedules, extra repayment processing, and real-time balance calculations for ING retail banking customers.
- Designed and exposed RESTful APIs consumed by ING's customer facing, digital channels, enabling customers to view building fund balances, submit payment requests, and track repayment progress.
- Utilised Azure & AWS cloud infrastructure with Kubernetes and Docker for containerized deployment, ensuring high availability and scalability of mortgage services.
- Wrote comprehensive unit and integration tests using JUnit to maintain code quality and reliability in a regulated financial environment.

SOFTWARE ENGINEER

BRIDGESTONE MOBILITY SOLUTIONS (WEBFLEET)
May 2022 – Feb 2025 | Amsterdam, Netherlands

ReactJS, Redux, JavaScript, Java, Spring Boot, RESTful Web Services, Spring ORM, SQL, JUnit, Azure, AWS, Kubernetes, Docker, Microservices

Project: Webfleet TPMS – Tyre Pressure Monitoring System

- Developed and maintained full-stack features for Webfleet's Tyre Pressure Monitoring System (TPMS) — a real-time fleet safety solution that monitors tyre pressure and temperature across thousands of commercial vehicles and trailers.
- Built backend microservices in Java & Spring Boot to ingest, process, and analyse continuous sensor data streams from TPMS-equipped vehicles, detecting anomalies such as slow leaks, over/under-inflation, and temperature spikes.

SOFTWARE ENGINEER

NORTHERN TRUST CORPORATION

Jan 2022 – Apr 2022 | Pune, India

Java, Spring Boot, RESTful Web Services, Azure, Kubernetes, PHP, HTML, JavaScript, React, Redux

Project: Wealth Management Platform Modernisation

- Led the modernisation of Northern Trust's legacy Wealth Management application — a platform serving high-net-worth individuals and families with private banking, investment management, trust & estate services, and wealth planning advisory.
- Successfully migrated the application from a legacy PHP/HTML stack to a modern architecture using Java, Spring Boot, and React, improving performance, maintainability, and user experience.
- Developed reusable React components for wealth planning dashboards, portfolio views, and banking service interfaces, aligned with Northern Trust's design standards.

SOFTWARE ENGINEER

YASH TECHNOLOGIES

Sep 2019 – Dec 2021 | Pune, India

Java, Spring Boot, REST, NoSQL, Spring ORM, JUnit, Azure, Microservices, React, Redux, JavaScript, AppDynamics

Project: John Deere Financial – Construction Equipment Financing

- Built comprehensive full-stack solutions for John Deere Financial's heavy construction equipment financing platform, enabling contractors and construction companies to apply for loans and leases on heavy equipment (excavators, dozers, wheel loaders).
- Developed backend microservices in Java & Spring Boot supporting financing workflows including loan applications, credit assessments, repayment scheduling (instalment loans and leases), and PowerPlan commercial credit account management.
- Built React/Redux micro-frontend modules for the customer-facing financing portal, including equipment loan calculators, application forms, and account management dashboards.

ASSOCIATE CONSULTANT

ATOS PVT LTD
Aug 2018 – Aug 2019 | Pune, India

Java, Struts, Spring Boot, RESTful Web Services, Microservices

Project: BMW dealer application

- Specialised in web development for the BMW dealer application using RESTful Web Services and Spring Boot.
- Collaborated in a cross-functional team to enhance existing features and improve system stability and performance.

SOFTWARE ENGINEER

INFOSYS LTD
Dec 2014 – Jul 2018 | Pune, India

Java, Struts, JSP, RESTful Web Services

Project: Finacle Banking Application

- Worked on core banking and retail banking applications utilising Java and RESTful web services.
- Enhanced the functionality of loan and retail banking modules, improving processing efficiency and reliability.

EDUCATION

BACHELOR OF ENGINEER

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal, India
2010 - 2014 CGPA 7.2/10
